Full awareness or mindfulness in the practice of current clinical psychology and psychiatry: Explanatory contributions

Published On: February 28, 2019 | Pages: 003 - 010

Author(s): José M Bertolín-Guillén*

Introduction: In accordance with relevant historical sources and the objective of reducing the conceptual ambiguity surrounding full awareness or mindfulness, it should be emphasized that the aim of these concepts is better self-regulation and that the task of the observer is to remain equanimous between attraction and repulsion of what is being observed. Methods: A ...

Marijuana: Indian scenario

Published On: April 25, 2019 | Pages: 011 - 011

Author(s): Samarth Dandotiya*

Marijuana smoking culture in Indian youth has increased rapidly in the last decade and mostly the growth has been observed in urban population of the youth. It is strange because smoking marijuana a.k.a “ganja” once considered a practice done by poor and illiterate people or by sadhus and fakir, it is strange because the same youth which labeled marijuana as a drug ha ...

Suicide in Haiti

Published On: January 31, 2019 | Pages: 001 - 002

Author(s): Felicia Douglas*

“Suicide is a complex global public health problem, yet few studies have examined local socio-cultural explanatory models and other contextual factors surrounding suicide in low-and-middle income countries (LMIC)” (Hagaman et al., 2013). Haiti is one of many LMIC’s where suicide has not been studied until now. Strong cultural beliefs and fear of

stigma has played a la ...
