Anxiety and Depressive Symptoms in Patients with Hypothyroidism: A Cross-Sectional Study in Dakar, Senegal

Published On: November 27, 2025 | Pages: 025 - 031

Author(s): Momar Camara*, Doriane Kaburundi, Sokhna Seck, Rokhaya Gueye, El Hadji Makhtar BA, Ngoné D Diack, Djiby Sow and Aïda Sylla

Background: Hypothyroidism is frequently associated with affective disturbances; however, the burden of anxiety and depressive symptoms among Senegalese patients remains poorly documented. Objective: This study aimed to determine the prevalence of anxiety and depressive symptoms and identify the associated clinical, biological, and sociodemographic factors among pati ...

A Neuropsychological Perspective of the Extremist Mind

Published On: December 18, 2025 | Pages: 039 - 042

Author(s): MN Cunha* and OP Krupskyi

Extremism remains a persistent challenge for contemporary societies, with existing prevention and deradicalisation efforts often failing to fully address the psychological mechanisms underlying radical belief formation. This theoretical review examines extremism through an integrative psychological framework informed by, but not reducible to, neuropsychological resear ...

Models of Depression for Preclinical Drug Discovery and Development: A Transitional Perspective

Published On: September 09, 2025 | Pages: 016 - 024

Author(s): Michel Bourin*

Animal models of depression are most frequently encountered within the pharmaceutical industry to screen molecules and detect a putative antidepressant activity of a drug. The multiplicity of approaches and models makes comprehensive statements difficult, but animal models are necessary. These are experimental arrangements where a simple system is utilized to represent ...

Evidence Psychotherapy Options for Borderline Personality Disorders

Published On: August 19, 2025 | Pages: 008 - 015

Author(s): María-José Martín-Vázquez*

Borderline Personality Disorder (BPD) is a prevalent and severe condition that affects emotional regulation, interpersonal relationships, and identity. BPD affects 1-2% of the population, mainly women, with high comorbidity, especially post-traumatic stress disorder, and a significant suicide rate. The diagnosis is based on ICD-11 and DSM-5 criteria with functional ev ...
