Transcultural aspects in the treatment of posttraumatic and situational distress among middle eastern refugees

Published On: October 03, 2022 | Pages: 027 - 033

Author(s): Jan Kizilhan*

The increasing size of displaced populations seeking protection in third countries, should be considered in public health and especially in Psychotherapy in that countries. Refugees from the Middle East, usually from collective cultures, require special skills and modifications in the treatment setting. The cultural formulation (CF) of illness and suffering, as descr ...

A conceptual review on pretreatment anxiety management in a dental setting using hypnosis and progressive muscle relaxation

Published On: April 07, 2022 | Pages: 019 - 026

Author(s): Puja Sabherwal, Namita Kalra*, Rishi Tyagi, Amit Khatri and Shruti Srivastava

Dental anxiety is associated with the thought or idea of seeing the dentist and undergoing dental procedures. Anxiety-associated problems in the dental setting include avoidance of appointments, inability to provide successful dental care, and delay in optimal recovery. Anxiolysis is important to the level of being mandatory for suitable administration of dental care. ...

Hysteria and its deceptive masks

Published On: March 29, 2022 | Pages: 012 - 018

Author(s): Michel Bourin*

Hysteria still exists, even if this stigmatizing term has been abandoned in favor of more descriptive terms (dissociative disorders, conversion disorders, functional disorders), and represents a frequent and disabling pathology. Even if in some situations, the establishment of a definitive diagnosis remains difficult, more and more clinical and paraclinical signs are ...
