“Perrotta Human Defense Mechanisms Questionnaire (PDM-Q-v2)”: Development, regulation and validation of a psychometric instrument for the identification of the functioning of individual Ego defense mechanisms

Published On: October 14, 2023 | Pages: 072 - 078

Author(s): Giulio Perrotta*

Introduction: To date, theorizations on the workings of psychological ego defense mechanisms are affected by the psychodynamic influence and theoretical scaffolding of the last century. There is a need to update theories and models to make them more consistent and modern with recent innovations in psychotherapy. Materials and methods: A model related to the function ...

Predictors of psychopathologic symptoms by work-related stress factors in Mental Health Professionals of a tertiary-level Psychiatric Hospital in Mexico City

Published On: September 23, 2023 | Pages: 060 - 067

Author(s): María Eugenia Hernández Gutiérrez*, Patricia Ortega-Andeane*, Danelia Mendieta, Karla Vanessa García-Mejorado, Elvia Coballase-Urrutia, María Isabel Barrera-Villalpando, Anabel Flores Zamora and Maricela Irepan-Aguilar

Introduction: Mexico has a high prevalence of work stress; mental health professionals are a vulnerable group who experience demanding environments that place their own mental health at risk. Objective: The present study aimed to evaluate the work-related stress levels and development of psychopathology in mental health professionals of a tertiary-level psychiatric ...

“Perrotta Affective Dependence Questionnaire (PAD-Q)” : Development, regulation and validation of a psychometric instrument for the diagnosis of the affective dependence

Published On: September 13, 2023 | Pages: 051 - 059

Author(s): Giulio Perrotta*

Introduction: The construct of affective dependence is now considered a behavioural addiction, but the framework underlying the Perrotta Affective Dependence Model (PAD-M) considers it to be a manifested symptom of a specific psychopathological personality framework, and based on this theorization, the questionnaire (PAD-Q) was constructed to take into account the ide ...

How to help managing emotions felt by bipolar patients?

Published On: July 01, 2023 | Pages: 041 - 044

Author(s): Michel Bourin*

The regulation of the control of the emotional experience is one of the determining parameters of the adaptation of an individual to his environment. Bipolar disorder is a psychiatric pathology in which disturbances in the processing of

emotions are particularly marked during acute episodes and persist during the interictal period. Treatment with mood stabilizers gene ...

Potential of an antioxidant combination Twendee X® to treat depressive disorders

Published On: September 26, 2023 | Pages: 068 - 071

Author(s): Fukka You*, Yoshiaki Harakawa, Toshikazu Yoshikawa and Haruhiko Inufusa*

Depression and other neuropsychiatric disorders have major impacts on the daily life. These disorders are triggered by stress and obstacles stemming from changes in people's environment, relationships, finances, health, or in the case of many women, triggered by childbirth. An increase in the incidence of depression worldwide strongly correlates with modernization, ec ...

Drug therapy for bipolar disorder: A review of efficacy evidence

Published On: November 24, 2023 | Pages: 079 - 088

Author(s): Michel Bourin*

The purpose of this article is to provide scientific evidence on mood stabilizers used in the treatment of bipolar disorder. Indeed, it has proven difficult to develop drugs for this disorder, particularly in long-term treatment for relapse prevention. We review the main drugs that have obtained approval for use in the European Union and the United States. We take aga ...
