## Assessment of the Threshold Concentration of Ethyl Glucuronide in Hair for Diagnosing Chronic Alcohol use in Women: A Study in a Belarusian Clinical Cohort

Published On: May 29, 2025 | Pages: 001 - 003

Author(s): Razvodovsky YE\* and Schuriberco AV

Aims: To determine the threshold concentration of Ethyl Glucuronide (EtG) in hair for diagnosing chronic alcohol use in women. Methods: The study involved 15 alcohol-dependent women undergoing inpatient treatment for chronic alcohol use at the Grodno regional clinical center "Psychiatry-Narcology" (Belarus). The control group consisted of 15 moderately drinking repr ...
