Naloxone fill rates after opioid overdose

Published On: October 16, 2019 | Pages: 001 - 002

Author(s): Allison L Ruff*, Kristian Seiler, Patrick Brady and A Mark Fendrick

Over the past 25 years there has been a significant increase in the use and misuse of opioid analgesic medications. In April 2018, the US Surgeon General released an advisory pressing more laypersons to become trained and get access to naloxone for emergency overdose situations. ...
